

INSTYTUT FIZYKI
POLSKIEJ AKADEMII NAUK

WELCOME TO
POLAND

NARODOWA AGENCJA
WYMIANY AKADEMICKIEJ

The Institute of Physics of the Polish Academy of Sciences launched the Welcome Centre in June 2021. The action is implemented as part of the "Welcome to Poland" project of the National Agency for Academic Exchange.

The purpose of establishing the Welcome Centre was to provide assistance to foreign doctoral students and employees of the Institute of Physics in living matters, especially at the beginning of their stay in Poland. Scientists coming from abroad, at the beginning of their stay, encounter many problems that cannot always be helped by their research supervisors. In the Welcome Centre, foreigners can get help in finding long-term and short-term accommodation, obtaining a temporary residence permit in Poland, finding a school or kindergarten for children, assistance in registering and obtaining a PESEL number and providing all necessary other information regarding life in Poland. An employee of the Welcome Centre, Anna Senchenko, is a person who helps in solving the above-mentioned problems and thanks to this, scientists can focus on scientific work from the first days of their arrival.

Ms Anna Senchenko is waiting for foreign PhD students and employees in need of help at the Institute of Physics of the Polish Academy of Sciences, al. Lotników 32/46, building II, room 6, from Monday to Friday from 8:00 to 16:00.
